Lubricants used in the production and processing of food, beverages, pharmaceuticals and cosmetics have to fulfil not only technical requirements but also food regulatory, hygienic and special qualitative demands. Lubricants lubricate, protect, cool, seal, clean and guarantee a trouble-free and safe operation of the plants. Therefore, the correct choice of the lubricants plays a crucial role especially in the food-producing industry.

All ingredients of our ADDINOL FoodProof series are physiologically harmless and meet the European guidelines, the NSF category H1 as well as the requirements acc. to Kosher. The ingredients also meet the internationally accepted FDA standards and they are free from allergens acc. to Regulation (EU) No. 1169/2011, annex II.

From now on, all products of the FoodProof series are HALAL certified as well. The associated production processes here in Leuna have also been approved by Halal Control. That means the entire ADDINOL FoodProof range can be used in the respective manufacturing processes.

All products of our new FoodProof range are produced here at the site in Leuna and are thus characterized by our recognized quality "Made in Germany".
